

Managing Risk in a Health Setting

Outcomes

The course should give you an overview for ensuring you are reviewing and managing risk within a health setting environment. Risk within any organisation must be managed. Health Settings have risk factors which other organisations may not have to deal with.

Whether you are a small clinic, or a larger organisation, it is important that you know what risks there are within the health setting and how to manage these.

This unit will look at these factors

- What is risk?
- What types of risk there is
- Sources of the risk
- Risk management in relation to work health and safety (WHS) regulations
- Setting up risk management practices.

How long is this course?

- This course should equate to 10 CPD points
- The course should take you approximately ten hours if you read through all materials and watch each of the video clips, as well as complete the quizzes. It will depend on your rate of learning.
