Who should attend?

This full day course is intended for Sonographers who require a more thorough understanding and practical instruction in the areas of knee and ankle imaging.

Suggested Pre-course Activity

This course is aimed at those who are proficient General Sonographers, interested in exploring the specialty of MSK ultrasound, especially the knee and ankle. Material presented will be at an advanced level, and basic ultrasound concepts will be assumed.

Program SONO1

Friday, 9th March, 2018

MSK - Knee and Ankle

- 08:30 Registration
- 09:00 Indications for MSK assessment of the knee and ankle - including imaging modalities other than ultrasound, and other diagnostic investigations that may complement MSK ultrasound.
- 09:30 Detailed review of the anatomy of the knee - Participants will review standard imaging protocols, situations when non standard images are required, as well as minimum recording requirements.
- 10:15 Morning tea
- 10:30 Live scanning demonstration (knee) - Practical demonstration of the standard scan protocol, and normal sonographic findings. This session will also provide you with some tips & techniques to interrogate optimal imaging windows, and patient positions used to achieve the best imaging possible.
- 11:00 Practical Session 1 - Participants will have the opportunity to perform an MSK knee ultrasound examination under the guidance of our expert Tutor Sonographers.
- 12:00 Lunch
- 12:30 Detailed review of the anatomy of the ankle - Participants will review standard imaging protocols situations when non standard images are required, as well as minimum recording requirements.
- 13:15 Live scanning demonstration (ankle)
- 13:45 Practical Session 2 (ankle)
- 15:00 Discussion - During this interactive session we will discuss a variety of topics related to ultrasound of the knee and ankle, including
- What the Clinician requires from the study to provide an accurate diagnosis.
 - When and how the examination should be extended
- 15:30 Afternoon Tea
- 15:45 Case study and image review - During this session you will have the opportunity to interact with our clinical experts on a variety of case studies. This session incorporates complementary imaging modalities and investigations and how the ultrasound examination plays a role in the overall patient management.
- 17:00 Close

If you do not have sufficient experience in general sonography, please consider enrolling in our beginners or intermediate courses prior to attending SONO1.

Course Objectives

This course will build on the assumed basic ultrasound techniques and enhance MSK skills in the knee and ankle. Discussion sessions will cover detailed anatomy and landmarks, current trends in MSK ultrasound and complimentary imaging modalities.

Teaching comprises lectures and hands on scanning. Hands on scanning will be conducted in small groups.
