

Ultrasound Short Course:

General Ultrasound Imaging series - 2nd and 3rd Trimester and High Risk Pregnancy

Where: Sydney

AIHE
Level 3, 33 Chandos St
St Leonards NSW 2065

RAD4

Sat 2nd June, 2018 -
Sun 3rd June, 2018

Time:

08:30-09:00 Registration
(Sat)
09:00 - 17:00 (Sat/Sun)

Cost:

2 full day: \$1,400
(Registration fee includes a
light lunch and morning &
afternoon tea.)

CPD:

ASUM: 14 points (1A)
ASA: 14 points (1A)
ASAR: 14 points (1A)

Enrolment form:

Who should attend?

This two day course is intended for Radiology fellows who require a refresher in ultrasound, and registrars preparing for Part I or Part II exams. Sonographers who wish to refresh their knowledge of the latest sonographic techniques, as well as sonography students, and new graduate Sonographers beginning their scanning journey are also welcome under the Sonographer CPD Activities program. Healthcare practitioners who use 2nd and 3rd Trimester Obstetric ultrasound in their practice would also benefit from this package.

Program RAD4 -

Saturday 2nd June, 2018 - Second Trimester Pregnancy

- 08:30 Registration
- 09:00 Indications for second trimester pregnancy ultrasound - Including imaging modalities and other diagnostic investigations that may complement second trimester ultrasound.
- 09:30 Review of the imaging protocol - Participants will review standard imaging protocols, including real time scanning, as well as minimum recording requirements.
- 10:15 Morning tea
- 10:30 Live scanning demonstration - Practical demonstration of the standard scan protocol, and normal sonographic findings. This session will also provide you with some tips & techniques to interrogate optimal imaging windows, and discuss the main system controls used to achieve the best imaging possible.
- 11:30 Practical Session 1 - Participants will have the opportunity to perform a second trimester ultrasound examination of the under the guidance of our clinicians and sonographers, on real patients and simulation phantoms.
- 13:00 Lunch
- 13:30 Practical Session 2
- 14:30 Discussion - During this interactive session we will discuss a variety of topics related to Second Trimester ultrasound examinations including
 - What the clinician requires from the study to provide an accurate diagnosis.
 - When and how the examination should be extended
 - How to interpret and report on the image / examination
- 15:30 Afternoon Tea
- 15:45 Case study review - During this session you will have the opportunity to interact with our clinical experts on a variety of case studies. This session incorporates complementary imaging modalities and investigations and how the ultrasound examination plays a role in the overall patient management. *If you have a particular case you would like to discuss during this session please contact our Short Course Coordinator at least 2 weeks prior to the event.*
- 16:45 Open question/answer session with the experts
- 17:00 Close

Suggested Pre-course Activity

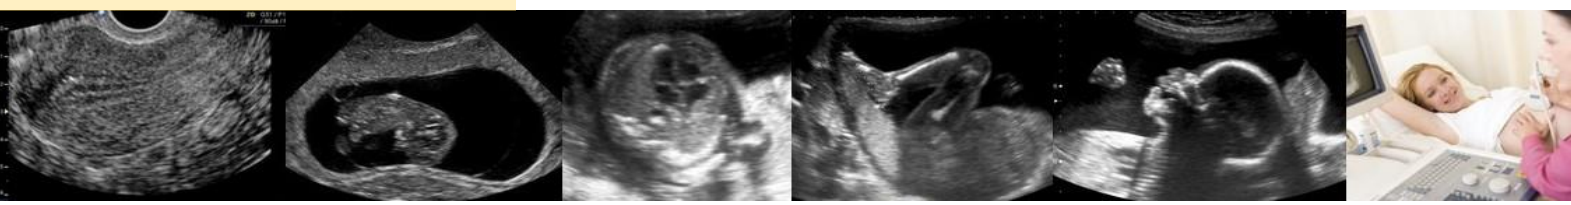

It is recommended that you undertake a basic Physics & Instrumentation course prior to this course.

We can assist you with advice on this if necessary.

Course Objectives

This course incorporates basic ultrasound techniques for application in radiology. Discussion sessions will cover image analysis, complimentary imaging modalities and the role of the ultrasound examination in the management of the patient.

Teaching comprises lectures and hands on scanning of both simulation phantoms and real patients. Hands on scanning will be conducted in small groups.

Program RAD4 -

Sunday 3rd June, 2018 -

Third Trimester and High Risk Pregnancy

- 08:30 **Registration**
- 09:00 **Indications for third trimester ultrasound** - Including imaging modalities and other diagnostic examinations that may complement third trimester ultrasound.
- 09:30 **Review of the imaging protocol** - Participants will review standard imaging protocols, including real time scanning, as well as minimum recording requirements.
- 10:15 **Morning tea**
- 10:30 **Live scanning demonstration** - Practical demonstration of the standard scan protocol, and normal sonographic findings. This session will also provide you with some tips & techniques to interrogate optimal imaging windows, and discuss the main system controls and patient positioning used to achieve the best imaging possible.
- 11:30 **Practical Session** - Participants will have the opportunity to perform an ultrasound examination of the under the guidance of our clinicians and sonographers, on both real patients and simulation phantoms.
- 13:00 **Lunch**
- 13:30 **Practical Session 2**
- 14:30 **Discussion** - During this interactive session we will discuss a variety of topics related to third trimester ultrasound imaging, including assessment of patient's considered high risk
- What the clinician requires from the study to provide an accurate diagnosis.
 - When and how the examination should be extended
 - How to interpret and report on the image / examination
- 15:30 **Afternoon Tea**
- 15:45 **Case study review** - During this session you will have the opportunity to interact with our clinical experts on a variety of case studies. This session incorporates complementary imaging modalities and investigations and how the ultrasound examination plays a role in the overall patient management. *If you have a particular case you would like to discuss during this session please contact our Short Course Coordinator at least 2 weeks prior to the event.*
- 16:45 **Open question/answer session with the experts**
- 17:00 **Close**
